

# **Take Control & Save**

*A Cooperative Effort for Energy Efficiency*

## **Member Rebate Programs**

**Programs effective July 1, 2008 through December 31, 2009**

### **Energy Star® Ground Source Heat Pumps:**

- \$750 per ton if it meets Boone's installation requirements (\$250 per ton from Boone and \$500 per ton from AECl; conditions apply)
- Limit of 10-ton for residential and 50-ton for commercial. Contact BEC for details.

### **Dual Fuel:**

- \$300 per system from Boone and \$150 per ton from AECl if Energy Star® with a minimum SEER of 14. **Effective 1/1/2010:** minimum SEER of 14.5; conditions apply.

### **CFLs (Compact Fluorescent Lights):**

Members can exchange incandescent bulbs for CFLs at Boone Electric. Audits will be done on a random basis. Limits apply. Based on availability.

### **Other programs:**

### **Home Performance by Energy Star® energy home audit program:**

There are incentives for work that is performed on top of program rebates, with a cost to the member for the audit. Contact BEC for details.

### **Window-Unit Air Conditioners:**

Receive a \$50 rebate for the first-time purchase or replacement of a high efficiency, Energy Star®-rated window-unit air conditioner.

### **Rebates on Energy Star®-rated appliances:**

- If the member has an electric water heater (for both new and existing homes):
- Clothes Washer - \$100
  - Dishwasher - \$50

### **Water Heater Program:**

Boone Electric Cooperative's standard program - 50 gallons free to new loads and \$300 cost to replace an existing electric water heater.

For all programs, the structure must be on a permanent foundation on land owned by the member.
